

## **Embracing Technology, Flying Higher!**

Civil Aviation Authority (CAA) Pakistan implemented web based software application for **Aero Medical** and **Flight Standards Department**. **CAA IT team** has implemented a cost effective solution for two of the major departments at Civil Aviation Authority. The system will act as a One Window facility that will be operational round the clock and it will be managed by staff from Civil Aviation Authority country wide.

**Aero Medical Application** has an online Examinee portal for Flight Crew Members and Air Traffic Controllers to fill and submit applications online. Aviation Medical Examiners and Chief of Aviation Medicine have the facility of filling Medical Examination Observations, online.

**Flight Standard Application** has an online scheduler platform to facilitate the audit planning activity. They are provided with the facility of recording audit results, managing funds, and maintaining a document repository.

This application aims to lessen manual work, reduce human errors, eliminate paper clutter, and eradicate unnecessary time lags. Also, the Dashboard and Reporting Module present useful information in diagrammatic illustration and statistical reports, with just a click of a few buttons. This enables CAA Management in effective decision making.
